ONCOLOGY LECTURE SERIES

“What is an Integrative Care Plan”

Dr. Lesley James
Board Certified Family Physician

Dr. James is a board certified family physician who graduated from Jefferson Medical College in 1997 and has been practicing medicine since 2002. She is a member of both the AAFP and the AOA honor society. She is also one of the few local physicians who has completed the two-year Fellowship in Integrative Medicine at University of Arizona under noted physician Dr. Andrew Weil. Although Dr. Andrew Weil did not invent integrative medicine, he is considered a pioneer in the field. Dr. James’ mission is to enrich conventional medical practice with a more natural approach to prevention and healing in one holistic practice. Rather than waiting for something to cure, or treating one symptom at a point in time, Dr James stands at the intersection of traditional evidence-based medicine and effective alternative (or preventative) medicine for a healthy ongoing lifestyle.

Ancient spirals represent the winding journey inward we must take if we’re to truly know & love ourselves. From that journey, we return with more power and wisdom.
